Dear Sir,  
Please be informed that your expert lecture on the above cited subject has been scheduled on 3rd May, 2023 in C Block Auditorium Third Floor from 11:00 AM onwards.

Looking forward to hearing from you soon.

Thanks and Regards,

**Dr. Barkha Bhatnagar**  
Professor and Head,  
Department of Nutrition and Dietetics  
Faculty Ph D Coordinator,  
Faculty of Allied Health Sciences

## Report of the Webinar/ Event/ FDP Program.

a) **Introduction:** SGT University provided an opportunity to the students of undergraduate and postgraduate programmes to attend an Expert Talk on "Quality Management System in Laboratories – Academic and Industrial" organized by the Department of Nutrition & Dietetics, Faculty of Allied Health Sciences. Dr. Barkha Bhatnagar, HOD, coordinated the event. All the other faculty members of the department, Dr. Akanksha Yadav, Dr. Govind Bhatt, Dr. Vatsala Saharan, Dr. Jyoti Goyat, Dr. Shelly Garg and Dr. Deepali Sharma played a pivotal role in the success of this event. The main objective of the event was to realize the importance of quality management system in product or service quality, operational efficiency, environmental performance, health and safety in the workplace and many more.

The lecture entitled "Quality Management System in Laboratories – Academic and Industrial" was initiated by Sarasvati Vandana and lighting of lamp by the dignitaries.

Speaker was felicitated with sapling by Prof. Vikas Dhawan Pro-Vice Chancellor Academics, Prof. M. Ejaz Hussain Dean, Faculty of Allied Health Sciences and Dr. Barkha Bhatnagar Head of Department Nutrition & Dietetics.

The event started with a welcome note given by PVC Academics, respected Prof. Vikas Dhawan. He appreciated for organizing the talk on such significant topic. He said that previously there were no parameters and quality as with the increase in advancement in science and technology there is also need to have the knowledge and importance of parameters of testing, quality check, calibration.

Dean concluded the event with a vote of thanks to the speaker Dr. S K Raza, PVC Sir, all the students and the faculty members indeed for such an informative and interactive session which was not only beneficial for students but also appeared insightful to the faculties as well.

The respected speaker also extended gratitude to PVC, The Dean and university for inviting him to deliver the lecture.

a) **Objective of the webinar/ Event/ FDP:** The expert talk aimed to realize the importance of quality management system in the laboratories.

b) **Brief content of lecture:** Dr. S K Raza introduced with the Quality Management System

(QMS) as a way in which an organization manages the interrelated parts of its business in order to achieve different objectives. His main focus was on how the QMS works in testing labs. He talked about all the features of a product or service which are required by the customers. He emphasized what quality management does in an organization: QMS ensures that its products or services satisfy customer's quality requirement and comply with any regulations applicable to those products/services. Organizations and institutes or labs should follow QMS documentations, depending upon several factors. He said that different protocols should be properly maintained to meet customer needs, previously most products were ISI marked but nowadays there are more FSSAI recognized labs. Food materials have to be tested in FSSAI focusing different quality parameters.

He also mentioned that organization can manage its way of doing things by systemizing management to have an efficient and effectiveness. All the working professionals should be clear about who is responsible for doing what, when, how, why and where. And different system standards provide organization with an international, state-of-the-art model to follow. He said that organizations or the one with complicated processes could not function well without a management system. There are different companies in such fields as aerospace, automobiles, defense and health care which have been operating through management systems for several years.

He introduced with different certifications especially about ISO and its different accreditation and other certification bodies, he also focused on ISO management system standards that helps organizations to improve their performance by specifying repeatable steps that organization consciously implements to achieve their goals and objectives, and to create an organizational culture that relatively engages in a continuous cycle of self-evaluation, correction and improvement of operations and processes through heightened employee awareness and management leadership and commitment. He introduced with the benefits of an effective management system to an organization including more efficient use of resources and improved financial performance; improved risk management and protection of people and the environment; increased capability to deliver consistent and improved services and products. These standards set out

requirements or guidance to help organizations in managing their policies and processes to achieve specific objectives. ISOs have same structure and contain many of the same terms & definitions/requirements; these standards are circulated and reviewed after certain period of time.

He emphasized on the management principles including customer focus, leadership; involvement of people, process approach, system approach, continual improvement; factual approach and mutual beneficial supplier relationships.

He also introduced different management standards and the concept of high level structures; and also with typical procedure that is required to be followed. He also discussed the differences among quality assurance and quality management.

He focused on recent studies of QMS suggesting that all the quality dimensions that are expected within an integrated system are strongly associated with the basic framework set by the different certification bodies. He also discussed the role of these standards in research and development for different departments including pharmaceutical, QMS in education.

He also focused on managing the quality records, procedures, manuals and other documentations; and also the committees should be well defined and should have a fixed council of members and are managed worldwide to maintain the harmony.

He also introduced with different testing divisions of the Food Analysis and Research Laboratory, Gurgaon, which is a well known testing, calibration, research and innovation company. It is an accredited body as per ISO/IEC 17025:2017 by National Accreditation Board for testing & calibration (NABL), they are also recognized laboratory by FSSAI, APEDA, Tea Board and IOPEPC testing, covering a wide range of food products for safety and nutritional characteristics to meet regulatory requirements. Their laboratory has a team of scientists, engineers, managers that are constantly working to improve services provided to customers and partners. They also helps firms to achieve the quality and regulatory standards, preserve brand, and also play role in assisting in growth, and providing assured quality to customers. The FARE Lab is one of the largest scopes with around 16,000 parameters, over 6000 customers, including international agencies. He

also added that the lab even provide trainings and consulting. And a wide range of testing to other sectors; they are also active members with organizations like BIS.

He also offered students to have training at their labs and also to plan visit to the FARE lab.

It was indeed a very well planned and organized lecture which proved to be very useful and enlightened talk for everyone present there and ended with a good note.
