Service Manager- North where she is accountable to lead the training activities both for internal associates and external customers. Her subject matter expertise in Ophthalmology domain has fetched her long-standing good will amongst the Ophthalmologist's and Optometrist's community. With constant connect and tireless support to the optical retail service providers she has ensured value enrichment in the field of service delivery.

Preamble:

Oculus Academy and SGT Ophthalmological Association organized a Hands-on Workshop on "Marking of Progressive Lenses" on 23rd September ,2022. *The workshop was aimed at upgrading the skills of Residents, Optometry Students and faculty of Ophthalmology & Optometry in the techniques of Marking of Progressive Lenses.* This was a very interactive session between the speakers and the participants. All the participants were benefitted by gaining knowledge about Progressive Addition Lenses

Date of activity: 23rd September ,2022

Organizers: Oculus Academy and SGT Ophthalmological Association, SGT University, Gurugram

Objective of the Workshop :

The objective of the workshop was to upgrade the skills of Interns, optometry students and Faculty regarding the marking of Progressive lenses, Design and Innovative Technology behind the design of Lenses

Description:

Progressive Addition Lenses are one-piece lenses that vary gradually in surface curvature from minimum value in the distance portion to a maximum value in the lower near portion. Progressive Addition Lenses (PALS) are characterized by a gradient of increasing lens power, added to the wearers for the correction of refractive errors. The gradient starts at the wearer's distance prescription at the top of the lens and reaches a maximum addition power, or the full reading addition, at the bottom of the lens
