Dear Dr. Brahm Kumar,

Thank you for your email and for showing the interest to visit NDTL.

You may kindly discuss with Dr. Shaily for fixing the date and time for the visit. I am copying this email to her.

With kind regards,

डॉ. पी. एल. साहू/ Dr. P. L. Sahu

40 Students of B.Sc. (MLT) II & IV SEM

Visit Details :

The students and Faculty members of Medical Laboratory Technology had the opportunity to visit the National Dope Testing Laboratory (NDTL) in New Delhi. The visit was organized as part of the University's ongoing efforts to provide students with real-world exposure to different fields and industries.

The National Dope Testing Laboratory (NDTL) in New Delhi is a premier analytical laboratory established by the Government of India to conduct anti-doping testing for Indian athletes. As an accredited laboratory under the World Anti-Doping Agency (WADA), the NDTL is responsible for drug testing samples collected from athletes in various sports events in India.

Upon arrival, the students were welcomed by the staff of the NDTL, who provided them with an overview of the laboratory's mission and objectives. The students were then given a tour of the laboratory, where they had the opportunity to observe various procedures involved in drug testing.

The laboratory staffs were very knowledgeable and provided the students with detailed explanations of the equipment used for analysis, including gas chromatography and mass spectrometry. The students were impressed by the organisation and cleanliness of the laboratory, which is essential for accurate and reliable test results.

Throughout the visit, the students gained a deeper understanding of the importance of drug testing in sports and the role of analytical laboratories like the NDTL in maintaining the integrity of athletic competitions. They also learned about the different steps involved in the testing

process and the strict protocols and guidelines that must be followed to ensure the quality of the testing process.

Overall, the visit to the NDTL was a valuable learning experience for the students, providing them with real-world exposure to the field of anti-doping testing. The laboratory staff were friendly and welcoming, and the students left the laboratory with a greater appreciation for the vital work at the NDTL. Dr. P. L. Sahu (Director-NDTL) motivated our students for bright carrier and given knowledge about the scope of dope testing in future.
